

## WORKSHOP

### Restoring lateral river connectivity

**Organisers : Bart Fokkens (ECRR) et Josée Peress (OFB, Centre ressources cours d'eau)**

Restoring river lateral continuity is key for reaching the objectives of the 25000 km free flowing rivers and for restoring riverine habitats set in the articles 4 and 9 of Nature Restoration Law.

This workshop will be presenting the nature restoration law in relation to river restoration and be exploring and sharing the challenges that the local river managers face when implementing lateral continuity restoration projects.
