

RECOMMENDATIONS FOR YOUR ORAL PRESENTATION

Speaking time

12-15 minutes will be allocated to the presentation of your paper, followed by **5 minutes for specific questions** (20 minutes for the whole presentation). In most sessions, 15 minutes will be allocated to more thematic debates, during which you will be able to talk over some common or complementary points in relation to the different papers presented, or discuss more general themes.

Beware! The session Chairman will be uncompromising regarding the **allocated speaking time**. To allow participants to attend the chosen presentation, all oral presentations will have to start exactly at the same time in each conference room and presentations will not be inverted.

Languages

Both English and French are spoken at the conference. For a good and efficient simultaneous translation, we suggest to express yourself as simply as possible and not too fast.

Power Point presentation

Presentation format

For all presentations to have a consistent layout, **please use the PowerPoint template [available online](#)**.

Do not use too many slides: 1 slide for 2 minutes of speech is far enough.

Use the proposed font type and size: simple font with a sufficient size for reading.

If you add pictures, the only formats accepted are: .jpg, .gif, .tif or .bmp (.pict format is not readable).

All video files linked to your presentation must be in the same file or directory as your presentation document.

For more safety, please have a .pdf version of your presentation as well (1 slide per page), to have another version to show if needed.

Presentation set-up

At least **two hours before your presentation** begins, please give your PowerPoint presentation (on a USB key) to the technicians in the preview room. If your presentation starts early in the morning, you will need to give it the day before on the conference venue. **Please note that it is not possible to connect a laptop computer in the conference room.**

In the preview room, a technician will add your presentation to the central system. You will have the opportunity to review your presentation and check that there are no compatibility problems.

Oral presentations

Speakers are expected to be in their conference room **15 minutes before the beginning of the session**, to meet the session Chairman. Please follow carefully the instructions received from the session Chairman, in particular regarding the speaking time allocated to you for your presentation.

Your presentation will be sent directly to the projection room via the internal system of the Lyon 2 University. A technician will launch your presentation on the screen of the conference room a few seconds before your presentation starts. The PC screen on the desk displays a resolution of 1024x768 pixels and is connected to a video projector. Once the presentation is launched, you will be able to control the programme by clicking on the mouse - the computer will work normally.

The audience of the conference will be made of scientists and practitioners, please make sure your presentation is adapted to all audiences.

5th International Conference

Integrative sciences and
sustainable development of rivers

30 June ▶ 04 July 2025
Lyon, France
